

State of the World's Children Report 2016

1. Insight - 1

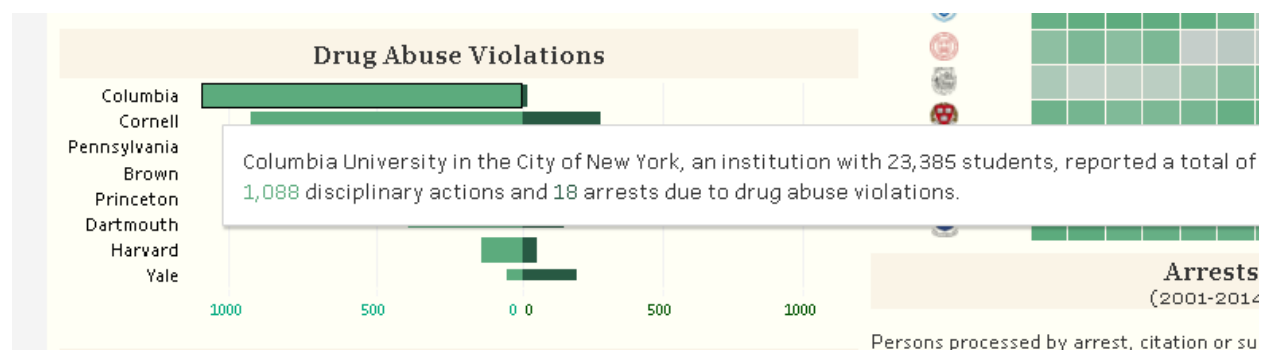

In this “State of the World’s Children Report 2016” , from that dashboard, I have selected the subject as “**Education**” and indicator as “**secondary school participation net attendance ratio 2009-2014 male**” and the country “**India**”.

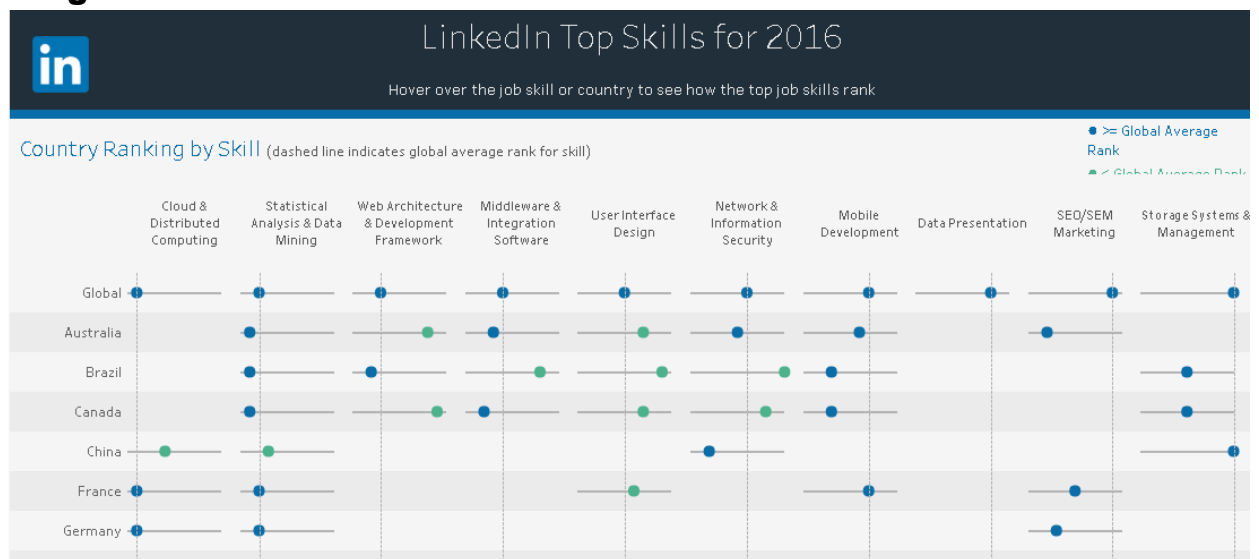

Accordinging to the survey report, it shows the comparison with the country “India” with 196 countries for the subject “Education”. Dark blue color in the map indicates the highest and in the brown color indicates the least percentage ratio. This map shows the secondary school participation attendance ratio for male in India is 59%.

2. Insight - 2

This insight shows the students from the listed universities in the graph who involved in disciplinary actions and arrested due to drug abuse violations. In the first bar graph, it shows the students involved in drug abuse violations in Columbia University in the New York city with 23,385 students, reported a total of 1,088 in disciplinary actions and 18 arrested due to drug abuse violations. In the bar graph, green color bar shows the students involved in disciplinary actions and dark green color shows the students arrested due to drug abuse violations.

3. Insight - 3

This insight shows the LinkedIn top skills for 2016 of different countries across the globe.

In this graph, it shows the countries' global average rank of their top skills as per the global rank. In this graph, a dashed line indicates the global average rank for a skill, and a blue dot indicates the above and equal global average rank, whereas a green dot indicates a less global average rank for the countries' ranking skill.
